

For Immediate Release

April 5, 2017

Long Road Closure Beginning April 10 Through December 10, 2017 Motorists Advised of Detour Routes

Construction of the Long Road Reconstruction project will begin on Monday, April 10. The purpose of this project is to reconstruct a corridor that was originally paved in 1972 and is now at the end of its service life, requiring a full depth reconstruction. The project will also consist of improving the drainage, mitigating the winter icing, adding landscaping to enhance the corridor appearance, maintaining the rural nature of the area, improving trail connectivity, increased pedestrian safety, and guardrail replacement to meet current standards. In addition, the Village partnered with Southgate Water District to incorporate the needed replacement of Southgate's waterline into the project.

Road Closure Information

Motorists are advised that Long Road will be closed beginning Monday, April 10 through Sunday, December 10, 2017. The project will have full closures within the project limits with NO THROUGH ACCESS. Signs will be placed in advance at the intersections of Holly Street and Orchard Road and Orchard Road and University Boulevard to advise through traffic to use either Arapahoe Road or Belleview Avenue as alternate routes.

Throughout the project, Greenwood Village will work with the Greenwood Village Police Department, City of Centennial, and the Arapahoe County Sheriff's Office to mitigate concerns related to traffic issues caused by the increased traffic volumes along the detour routes.

For more information about the project including road closures and maps of detour routes, visit the project website at www.LongRoadReconstruction.com.

Questions related to the project can be directed to John Wannigman, Greenwood Village Public Works Manager-Roads, at 303-708-6139 or email jwannigman@greenwoodvillage.com.
